Method

TIMES = THE MOMENT IN THE VIDEO

1. Mix the almond flour, coconut flour, xanthan gum and a little salt very thoroughly so the xanthan is evenly spread. Set aside. 0:38
2. Melt the 1½ oz butter in a pan over low heat and cook until lightly browned, then add the allulose and stir until it melts. 1:37
3. Pour in the water all at once and keep stirring while you add the dry ingredients gradually. When it forms a dough, take it off the heat and keep stirring to cool it. 1:52
4. Beat the egg. When the dough is cool enough to touch, stir in the egg until smooth. 2:12
5. Spoon the dough into a piping bag with a star tip and pipe churro shapes onto a lined baking tray. Bake in a preheated oven at 350°F for 20–25 minutes. 2:39
6. While they bake, mix the ½ tbsp allulose with the ½ tbsp cinnamon. 3:07
7. Brush the hot churros with melted butter and sprinkle generously with the cinnamon mix. 3:22

> **Tip** Allulose makes the churros brown more than erythritol. On an electric hob, keep stirring after switching off so the dough doesn't catch. 6 loops is our count from the tray.

The method is a summary in our words — the video shows every step.
