Sugar-free and very low in carbs: heavy cream replaces milk and erythritol replaces sugar, so nearly all of its energy comes from fat, which suits a keto day. About 180 kcal a glass.

Diet notes: Keto (3.7 g net carbs a serve).

Ingredients

6 · MAKES 1 × 1 GLASS (250 ML)

- [ ] 1 tbsp **instant coffee powder**
- [ ] 1 tbsp **powdered erythritol**
- [ ] **Water**: 1 tbsp boiling water
- [ ] 50 ml heavy (whipping) cream
- [ ] a splash of **water** to thin the cream (about 50 ml)
- [ ] a few **ice cubes**

Contains: Milk. Check labels on stock, sauces and spice mixes.

Method

TIMES = THE MOMENT IN THE VIDEO

1. Put 1 tbsp instant coffee powder, 1 tbsp powdered erythritol and 1 tbsp boiling water in a bowl: equal parts of each. It must be instant coffee; brewed coffee or espresso won't whip. 2:04
2. Whip with an electric beater until it froths, then turns thick, creamy and lighter in colour, like whipped cream that holds on the bowl. A hand whisk works too but takes several minutes. 3:16
3. Pour 50 ml heavy cream into a glass and thin it with a splash of water so it is more like milk. Add ice cubes. 4:17
4. Spoon the whipped coffee on top, scraping out every bit, and smooth it over. Stir it into the cold cream before you drink it. 4:59

> **Tip** The foam is strong and sweet on its own, so mix it in well. For a non-keto version, use milk instead of the cream and water.
