Method TIMES = THE MOMENT IN THE VIDEO

1. Toss the chicken with the seasoning powder, curry powder, thyme, ground ginger, garlic and onion powder, black and red pepper and salt. Marinate for about an hour (or overnight in the fridge). 1:03
2. Heat the cooking spoon of oil in a pot, add some of the onion and the chicken and stir-fry until the chicken is white all over and just starting to brown. 5:02
3. Pour in about 350 ml water, stir and bring to a boil. 7:38
4. In a separate pan heat a little oil and fry the rest of the onion with the extra curry powder and thyme, then add the peppers and carrots with ½ tsp seasoning powder and stir-fry 3–5 minutes so they stay crisp. 7:54
5. Tip the vegetables into the chicken pot, season with salt to taste, cover and simmer 7–8 minutes. 9:31
6. Whisk the corn flour into 240 ml water until smooth, stir it into the pot and simmer briefly until the sauce thickens to your liking. 6:07

> **Tip** Serves 4 (our estimate); serve with rice, as the cook does. Salty as made: about 1,550 mg sodium a serve from the salt and seasoning powder; skip the finishing 1 tsp salt to bring it under 1,000 mg. Any chicken cut works.

The method is a summary in our words — the video shows every step.
